

AMAN ANSARI

Full Stack Developer | Cloud & Backend Systems

iamamanansari786a@gmail.com | 8149404438 | linkedin.com/in/-aman-ansari | github.com/ansariamann | leetcode.com/teatoast

PROFESSIONAL SUMMARY

Full Stack Java Developer with hands-on experience building scalable, event-driven microservices and deploying cloud-hosted applications. Proficient in **Java 17**, Spring Boot, and **AWS**, with a track record of designing fault-tolerant backend systems using Apache Kafka and Docker. I have qualified **GATE 2026** showing strong grip on core fundamentals. I have solved over **400 Leetcode** problems demonstrating strong problem solving ability.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL, C

Backend & Frameworks: Spring Boot, Spring, Hibernate/JPA, RESTful APIs, Microservices, Apache Kafka

Cloud & DevOps: AWS (EC2, S3, VPC), Docker, CI/CD (GitHub Actions), Git/GitHub, Linux, Postman

Databases & Serverless: MySQL, PostgreSQL, MongoDB, SQLite, Firebase, Cloudflare, Upstash

Frontend: React, Next.js, Capacitor (cross-platform mobile), HTML5, CSS3

Data/ML Stack: Pandas, NumPy, Scikit-learn

AI Tools: codex, gemini-cli, Antigravity, warp.dev, Amazon kiro, cursor

EXPERIENCE

Software Intern — SEO & Automation — Coneio | Hyderabad, Telangana

Nov 2025 – Mar 2026

- Built Python ETL pipelines to scrape and process data across 6,000+ web pages, automating reporting workflows and cutting manual data entry by 40%.
- Implemented SEO optimization strategies for client websites, increasing search engine visibility by roughly 25% and improving content discoverability. Performed keyword research for SEO process.

PROJECTS

Hospital Management System | Java, Spring Boot, Apache Kafka, Docker, Maven

Nov 2025

- Architected a microservices-based hospital management system for appointments and billing, with a unified API Gateway handling over 10,000 daily requests.
- Implemented role-based access controls to secure sensitive patient data and optimized database queries, improving response times by 30%.
- Used Apache Kafka for event-driven communication across 5 microservices, keeping the system highly available and fault-tolerant.
- Containerized the application with Docker and persistent volumes, cutting deployment and setup time in half across environments.

Confession Roulette | React, Next.js, Capacitor, Firebase, Cloudflare, Upstash

Aug 2026

- Built a real-time mobile app broadcasting live 10-second content via Firebase Firestore, scaling smoothly to 50,000 concurrent users.
- Designed a serverless backend on Cloudflare and Upstash QStash to process 1,000+ asynchronous operations per minute without persisting data server-side.
- Developed an automated moderation pipeline using toxicity APIs and Regex/NER to catch harmful content and PII pre-publish, cutting manual moderation by 95%.

Custom HR application | Python, react, JavaScript, HTML/CSS, PostgreSQL

Jan 2026

- Developed a HR outsourcing application intended for the HR agencies distributing candidates across several clients. Used python as a backend. Implemented client and admin dashboards using web frameworks and The backend included a full pipeline for candidate application.
- Implemented custom resume parsers using regex. Also included authentication system, asynchronous communication, failure fallback mechanism. Included a swagger api documentation.

EDUCATION

Shri Guru Gobind Singhji Institute of Engineering and Technology — B.Tech, Computer Science & Engineering | CGPA: 7.98 | Nanded, Maharashtra | Dec 2021 – May 2025

Dayanand Science College — HSC (Maharashtra Board) | 94.5% | Latur, Maharashtra | 2019 – 2021

ACHIEVEMENTS & CERTIFICATIONS

- Machine Learning — Columbia University (edX)
- Oracle Cloud Infrastructure 2025 Certified Developer Professional
